PROFILE

Final-year MSc Software Engineering student at EPITA in Paris with hands-on experience building full-stack and AI-enabled applications using Python, FastAPI, Django, React and REST APIs. Recent work includes RAG, LLM automation, healthcare software and CI/CD. Seeking a 6-month end-of-studies internship and available immediately with an EPITA convention de stage.

TECHNICAL SKILLS

Programming: Python, TypeScript, JavaScript (ES6+), Java, SQL, C/C++

Frontend: React.js, Vite, HTML5, CSS3, Tailwind CSS, React Hooks

Backend & APIs: FastAPI, Django, DRF, Node.js, Express.js, REST APIs, Pydantic, JWT, OAuth 2.0

AI & Automation: RAG, LangChain, AI Agents, Gemini API, OpenAI API, Llama 3.2, Ollama, Prompt Engineering, n8n

Data / Cloud / DevOps: PostgreSQL, MySQL, MongoDB, SQLite, AWS, Docker, Kubernetes, Terraform, GitHub Actions, CI/CD

SELECTED PROJECTS

RAG Document Assistant — Python | RAG | LLM

Live: https://rag-document-assistant-1-nr8a.onrender.com/

- Built a document Q&A application using retrieval-augmented generation to retrieve relevant context and generate grounded answers.

AI Support Ticket Assistant — FastAPI | React | Llama 3.2

GitHub: https://github.com/Jameslurtin/ai-support-ticket-assistant.git

- Built and deployed a full-stack application that classifies support tickets and generates priorities, summaries and suggested actions.

FRIDAY - Local AI Voice Assistant — Python | Llama 3.2 | Ollama

GitHub: https://github.com/Jameslurtin/Friday_Ai.git

- Built a modular local AI assistant combining speech-to-text, local LLM processing, text-to-speech and conversation context.

AI Email Reply Agent — FastAPI | React | Gemini | Gmail API

GitHub: https://github.com/Jameslurtin/AI-Email-Reply-Agent.git

- Built an OAuth 2.0 workflow that reads Gmail messages, generates context-aware replies with Gemini and sends responses through the Gmail API.

Telehealth Secure EHR Platform — React | Django | AWS | Docker

- Developed a healthcare platform with 14 documented REST endpoints, MySQL, JWT authentication and role-based access control.

PROFESSIONAL EXPERIENCE

Altos Technology - React.js Developer / Software Engineer Trainee — Kochi, India | 6 months

- Built reusable React components and integrated frontend features with REST APIs using Axios.
- Contributed to debugging, Postman API testing, Git/GitHub workflows, code reviews and technical documentation in an Agile environment.

EDUCATION

EPITA - MSc Software Engineering — Paris | 2024 - Present

- Final-year MSc focused on software engineering, full-stack development, APIs, databases, cloud/DevOps and application architecture.

LANGUAGES & AVAILABILITY

Languages: English - B2+ | French - A2, actively improving

Availability: Immediately | 6-month full-time final-year internship | EPITA convention de stage
